Dear Editors,

We would like to express my sincere congratulations to you for launching the new journal *Cardiology Discovery* (*CD*). There is no doubt that *CD* creates a platform of international collaboration and exchange cutting-edge information on cardiovascular research and education, thereby contributes to the progress of cardiovascular medicine and surgery in the world.

In the aging society, cardiovascular diseases are the leading causes of death, however, the patients’ characteristics and the prognosis are quite different among races and countries. Although for the past quarter century, cardiovascular medicine has developed dramatically based on numerous randomized clinical trials, there is still a huge undiscovered area. For the next quarter century, it would be important to develop precision medicine in the field of cardiovascular medicine, as recent progress in cancer treatment. To realize precision medicine in Asia, international collaboration, especially relations between our societies will increase in importance.

The *CD* will publish high-quality papers on all aspects of cardiovascular medicine and surgery, including original clinical, epidemiological, basic, and translational research, health services and outcomes studies, state-of-the-art reviews, technical evaluations, case reports, editorial, perspective, consensus, and guideline papers. We believe that this journal will provide valuable information and suggestion to improve our clinical practice.

We wish your journal – *CD* every success and look forward to collaborating with your editorial team and the Chinese Society of Cardiology.

Toshihisa Anzai, MD, PhD
Editor-in-Chief, *Circulation Journal*
Director of Japanese Society of Cardiology
Professor and Chairman of Cardiovascular Medicine,
Hokkaido University Graduate School of Medicine.
