Current Opinion in Infectious Diseases was launched in 1988. It is part of a successful series of review journals whose unique format is designed to provide a systematic and critical assessment of the literature as presented in the many primary journals. The field of infectious diseases is divided into 11 sections that are reviewed once a year. Each section is assigned to a Section Editor, a leading authority in the area, who identifies the most important topics at that time. Here we are pleased to introduce the Section Editors for this issue.

SECTION EDITORS

Genovefa A. Papanicolaou

Genovefa A. Papanicolaou is an Infectious Disease physician focusing in patients with hematologic malignancies and hematopoietic cell transplant recipients. She is the Director of Clinical Trials for the Department of Subspecialty Medicine at Memorial Sloan Kettering Cancer Center and Professor at Weill Cornell Medical College at Cornell University in New York, USA. Her research interests include viral infections, biomarkers and precision prevention. She serves in a volunteer capacity as Chair of the Infectious disease special interest group (ID-SIG) of the American Society of Transplantation and Cellular Therapy (ASTCT).

Dionysios Neofytos

Dionysios Neofytos is an Infectious Disease specialist with expertise in infectious disease complications in patients with hematologic malignancies and bone marrow and solid organ transplant recipients. Since the completion of his training in Infectious Diseases at Thomas Jefferson University Hospital in Philadelphia, PA, USA, in 2006 he has joined the Faculty and worked as an attending physician with the Transplant Infectious Disease Services at the Johns Hopkins University in Baltimore, MD, USA, and the Memorial Sloan Kettering Cancer Center in New York, NY, USA. Since 2016, he joined the Division of Infectious Diseases at the University Hospital of Geneva, in Geneva, Switzerland. His research and area of expertise are focusing on the epidemiology, diagnosis and management of viral and invasive fungal infections in immunocompromised hosts.

Trish M. Perl

Trish M. Perl, MD, MSc, is the Jay P Sanford Professor in the Departments of Medicine (Infectious Diseases) and the Chief of the Division of Infectious Diseases at UT Southwestern Medical Center in Dallas TX, USA. She formerly was at Johns Hopkins University School of Medicine, USA, in the Division of Infectious Diseases in the Department of Medicine, in Epidemiology at the Bloomberg School of Public Health and the Senior Epidemiologist for Johns Hopkins Health System. Dr Perl received her Bachelor of Arts and medical degree from the University of North Carolina at Chapel Hill, USA, and a Master of Science degree from McGill University in Montreal, Canada. She completed a residency in internal medicine at McGill University and a fellowship in infectious diseases and clinical epidemiology at the University of Iowa, USA. She was on faculty at the University of Iowa for several years before moving to Hopkins where she was the Hospital Epidemiologist at Johns Hopkins Hospital from 1996 to 2011 and then the Health System Epidemiologist until 2016 when she moved to UTSW.

She has extensive practical and research experience in the field of healthcare associated infections and resistant and epidemiologically significant organisms and is recognized globally for her innovation and research in healthcare associated infections, antimicrobial resistance, their transmission and prevention. Because of this she helped manage
international outbreaks including SARS, MERS CoV, Ebola and consults with international governments on guideline development and strategies to prevent healthcare associated and respiratory virus infections and antimicrobial resistance.

An active researcher, Dr Perl has been funded by the CDC, BARDA and the Veteran’s Affairs Administration over the years. She has authored or coauthored over 250 peer-reviewed articles. She actively reviews grants for the NIH.
