
**ERRATUM**

**Femtosecond Laser-Assisted Cataract Surgery: Does It Improve Outcomes in Fuchs Endothelial Corneal Dystrophy?: Erratum**

In the April 2021 issue of *Cornea* in the article by Koo, “Femtosecond Laser-Assisted Cataract Surgery: Does It Improve Outcomes in Fuchs Endothelial Corneal Dystrophy?,” the third sentence from the end of the last paragraph should read:

If we acknowledge that corneal decompensation is the “most undesirable” endpoint for these patients, we have learned that FLACS did not appear to lower rates of corneal decompensation in these eyes.18
