Table of Contents

April 2015 Issue

Abstracts or summaries of online content are printed in every issue of Obstetrics & Gynecology in this section. The complete documents can be found on our web site, www.greenjournal.org. The specific URL for the content in this section is printed at the end of the abstract or summary.

What's New Online April 2015

○ A new Quick Poll on perineal lacerations in vaginal delivery is available. See the article by Friedman et al (“Evaluation of Third-Degree and Fourth-Degree Laceration Rates as Quality Indicators;” p. 927).

○ Links to the following web-based resources or journals have been provided for selected content in the April 2015 issue:

Clinical Obstetrics and Gynecology

• “Red Blood Cell Salvage During Obstetric Hemorrhage” by Milne et al (p. 919)

Cochrane Review and Clinical Obstetrics and Gynecology

• “Sociodemographic Disparities in Advanced Ovarian Cancer Survival and Adherence to Treatment Guidelines” by Bristow et al (p. 833)

○ “Evaluation of Third-Degree and Fourth-Degree Laceration Rates as Quality Indicators” by Friedman et al (p. 927)

○ “Validation of a Vaginal Birth After Cesarean Delivery Prediction Model in Women With Two Prior Cesarean Deliveries” by Metz et al (p. 948)

Cochrane Review, Clinical Obstetrics and Gynecology, and Pearls of Exxcellence

• “Association Between Obesity and the Trends of Routes of Hysterectomy Performed for Benign Indications” by Mikhail et al (p. 912)

Pearls of Exxcellence

• “Placenta Accreta and Vaginal Bleeding According to Gestational Age at Delivery” by Rac et al (p. 808)

○ “Contribution of Placenta Accreta to the Incidence of Postpartum Hemorrhage and Severe Postpartum Hemorrhage” by Mehrabadi et al (p. 814)

○ A podcast, featuring Dr. Nancy Chescheir reviewing the Editors’ Picks for the April 2015 issue, is available.

○ Dr. Kristin Riley presents a concise video summary of her case report on bowel perforation after placement of tubal occlusion contraceptive. See the article, “Bowel Perforation After Placement of Tubal Occlusion Contraceptive” (p. 860).
