Table of Contents

July 2015 Issue

Abstracts or summaries of online content are printed in every issue of Obstetrics & Gynecology in this section. The complete documents can be found on our web site, www.greenjournal.org. The specific URL for the content in this section is printed at the end of the abstract or summary.

What’s New Online July 2015

- Journal Club questionnaires accompany the articles by Ngo et al (“Ketorolac for Pain Control With Intrauterine Device Placement: A Randomized Controlled Trial”; p. 29) and Lappen et al (“Outcomes of Term Induction in Trial of Labor After Cesarean Delivery: Analysis of a Modern Obstetric Cohort”; p. 115).
- Green Journal Global Health highlights two articles in this issue: “A Fatal Case of Strongyloidiasis in Pregnancy” by Buresch et al (p. 87) and “What Obstetric Health Care Providers Need to Know About Measles and Pregnancy” by Rasmussen and Jamieson (p. 163).
- A new Quick Poll on intrauterine device insertion is available. See the article by Levi et al (“Intrauterine Device Placement During Cesarean Delivery and Continued Use 6 Months Postpartum: A Randomized Controlled Trial”; p. 5) and the related editorial by Blumenthal and Goldthwaite (“Intrauterine Device Insertion During Cesarean Delivery: The Rising Tide of the Postdelivery Intrauterine Device”; p. 1).
- Links to the following web-based resources or journals have been provided for selected content in the July 2015 issue:
