ERRATUM

Erratum to: Comparison of surgical repositioning rates and outcomes for hydrophilic vs hydrophobic single-piece acrylic toric IOLs

In the February 2021 print issue, the Tables were numbered incorrectly and appeared out of order. The correct numbering is: Table 1 is Table 4; Table 2 is Table 3; Table 3 is Table 2; Table 4 is Table 1. The callouts in the text are correct as published.

The full-text and PDF versions of the article on the journal website have been updated; the online version now differs from what was originally published and from the print version.

This error was made during production and is not the fault of the authors.

Erratum to: Reply to comment on: Distinct differences in anterior chamber configuration and peripheral aberrations in negative dysphotop

Luc van Vught, BSc, Jan-Willem M. Beenakker, MSc, PhD, Gregorius P.M. Luyten, MD, PhD, FEBOphth. Reply to comment on: Distinct differences in anterior chamber configuration and peripheral aberrations in negative dysphotop. J Cataract Refract Surg 2021;47:140–141.

In the title of the Reply the last word is misspelled: “dysphotop” should be “dysphotopsia.” The full correct title is:

Reply to comment on: Distinct differences in anterior chamber configuration and peripheral aberrations in negative dysphotopsia

Erratum to: Reply

In the second paragraph of the Reply, the authors reference an article by Galvis et al. The citation to the article is missing. The correct text and reference are:

In this last indication, the devices are implanted in the anterior chamber, which leads to the various complications that we reported, and which are also reported in the literature by Galvis et al. in the same conditions.1
