Use of Integrated Dual Disorder Treatment Via Assertive Community Treatment Versus Clinical Case Management for Persons With Co-Occurring Disorders and Antisocial Personality Disorder: Erratum

In the subheader line of Table 1, among participants with No CD/ASPD, the SCCM group should indicate inclusion of 47 people, while the ACT group included 41 people. In addition, the last sentence of the first paragraph of the analyses section should read “47 assigned to SCCM and 41 assigned to ACT.”
